Know exactly what your product label must legally say.

Net weight

Net Wt 8 oz (227 g)

Fire-safety warning (ASTM F2058)

WARNING

To prevent fire and serious injury:

- Burn within sight. Never leave a burning candle unattended.
- Keep away from things that catch fire.
- Keep away from children and pets.

Always burn candles on a stable, heat-resistant surface. Keep the candle clear of matches, wick trimmings, and debris. Stop use when 1/2 inch (1 cm) of wax remains. Trim wick to 1/4 inch (6 mm) before each use.

Note: Per ASTM F2058, precede the signal word "WARNING" with the safety-alert symbol (an equilateral triangle enclosing an exclamation mark). Place the warning so it is legible when the candle is positioned for use; for small candles the warning may appear on the packaging or a tag.

Net-weight statement

Net Wt 8 oz (227 g)

Note: Place the net-quantity statement in the bottom 30% of the principal display panel, parallel to the base, in distinct type. US customary units are declared first, with the metric (SI) equivalent following.

Maker identity line

Made by [Your business]

[City, ST ZIP]

Note: Replace any bracketed placeholders with your firm name and city, state, and ZIP. Use "Manufactured for" or "Distributed by" if you are not the manufacturer. A street address is required only if the firm is not listed in a current city/telephone directory.

Proposition 65 warning (California)

WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

Note: Precede "WARNING" with the Prop 65 warning symbol (a black exclamation point in a yellow triangle). Only required for products sold in California. Confirm whether your specific exposures warrant the Cancer, Reproductive Harm, or combined wording.
